

# Purchase 50% less storage capacity—guaranteed\*.

Make the move to HP 3PAR® Utility Storage as part of your next tech refresh and halve the amount of capacity required to store your data—or HP will make up the difference by providing free disk capacity and any related software and free support associated with the additional disk capacity and software.

## The Get Thin Guarantee\*: save 50% with a technology refresh

Simply purchase any HP 3PAR Storage System and use HP 3PAR Thin Conversion Software to remove unused space from fully allocated volumes on your traditional storage arrays, transforming them into new “thin” volumes on the HP 3PAR array. We guarantee that you’ll reduce your traditional capacity requirements by 50% or more, or we’ll make up the difference by providing free additional disk capacity, software, and support. What could be simpler?

With the HP 3PAR Get Thin Guarantee\*, saving 50% on storage capacity is as easy as 1-2-3:

### 1 Purchase any HP 3PAR Storage System

**HP 3PAR Utility Storage arrays feature Thin Built In™ technology that provides an efficient, ASIC-based mechanism for converting traditional “fat” volumes from other platforms to more efficient “thin” volumes on HP 3PAR arrays.**

Purchase any F-Class or T-Class Storage System with HP 3PAR InForm® Operating System Software version 2.3.1 or higher, HP 3PAR Thin Provisioning Software, HP 3PAR Thin Conversion Software, and HP 3PAR Virtual Copy Software.

### 2 Use HP 3PAR Thin Conversion Software to convert your traditional “fat” volumes to new “thin” volumes on the system

**HP 3PAR Thin Conversion Software works with Thin Built In hardware capabilities to effectively and rapidly reduce traditional volumes to half their size—or less—while preserving service levels and without impacting production workloads.**

Use HP 3PAR Thin Conversion Software to complete the conversion in accordance with the Get Thin Guarantee Terms and Conditions.

### 3 Experience capacity savings of 50% or more

**With HP 3PAR Thin Provisioning Software, you’ll purchase only the disk capacity you actually need, only as you actually need it. No more overprovisioning, no more up-front allocations to accommodate future growth. No more guessing. No more waste.**

If converting to HP 3PAR Utility Storage hasn’t reduced the capacity required to store your written data by 50% or more as compared to your legacy arrays, HP will make up that capacity shortfall with free additional disk capacity and related software and support as described in the Get Thin Guarantee Terms and Conditions.
